## Presentors

### Jamie Woodruff

Special guest speaker, **Jamie Woodruff** joins us from the UK, who travels the world teaching people the importance of System and Network Security and is well known for disclosing worldwide Exploits/ Vulnerabilities within leading security applications such as, Facebook, Youtube, Twitter, Apple, Google and Microsoft. Using live demonstrations, Jamie will demonstrate how professionals bypass electronic access control systems and gain entry to your data.

### Jeff Birnbach

Jeff Birnbach is **Managing Director of the Sylint Group**. His background includes over 30 years in senior leadership roles in software and emerging technology. Jeff has extensive experience in information security, incident response, analytics, and investigations. In his current role he oversees digital data forensics and cyber security teams focused on intrusion detection, cyber breach investigation, evidence preservation, malware identification and remediation. Sylint, a nationally recognized leader in cyber security, is one of only 13 firms in the US authorized to investigate credit card breaches (PFI) for the payment card brands. Sylint's clients include Fortune 100 companies, AmLaw 100 firms, and non-profit organizations, as well as government agencies.

### Christopher J. Belvedere

Christopher Belvedere is an **Assistant Vice President, Chubb & Son**, and the territory manager for Chubb's specialty insurance business unit in Tampa, Florida. Chris is responsible for the agency relationships and all management and professional liability business in the territory which includes the states of Florida, Alabama, and Mississippi. Chris is also a Chubb subject matter expert on the threat of cyber liability to public, private and not for profit companies.
